INSIDE THIS BOOK

CONTENTS

01 **WHO WE ARE** 03
Six years of paper, made in Dhaka

02 **ABOUT US** 04
Mission, journey and how we work

03 **SUSTAINABILITY** 05
Why a paper cup is the better cup

04 **PLASTIC & OUR TEA STALLS** 06
The everyday problem we set out to fix

05 **HOW MUCH PLASTIC ARE WE SAVING?** 07
The numbers behind the switch

06 **SDG COMMITMENTS** 08
Six goals we work toward

07 **WE LOVE WHAT WE DO** 09
Because we are passionate about it

08 **ECO-FRIENDLY PAPER CUPS** 10
Range, sizes, full specification, custom print

09 **OUR OTHER PRODUCTS** 14
Food, print, labels, pharma, retail

10 **WHY SELECT US** 17
Five promises we keep

11 **OUR MACHINES** 18
Print, finish, cut, form

12 **CLEANLINESS & QUALITY CHECK** 19
Every batch, measured

13 **HOW WE MAKE PAPER CUPS** 20
Sheet to sleeve in six steps

14 **CLIENTS** 21
Brands that pour into our cups

15 **THE PAPER INDUSTRY** 22
Feasibility, with sustainability

01

WHO WE ARE

PAPER PEOPLE, SINCE 2020.

Paperware Factory is a Dhaka-based manufacturer of paper cups, food packaging and printed paper products. We turn board and ink into things people hold every day — and we keep plastic out of the picture.

Founded in Dhaka in 2020. Today: printing, lamination, cutting, die-cutting, pasting and cup forming under one roof, run by our own team.

ABOUT US

Our vision is simple: help Bangladesh move off single-use plastic, one cup, one box, one bag at a time.

THE PAPERWARE TEAM ON THE FACTORY FLOOR, DHAKA

OUR JOURNEY

FAR FROM OVER

We keep pushing on quality, process and range — working toward a market where plastic cups are a memory and paper is the normal choice.

ECO-FRIENDLY PRODUCTION

PAPER FIRST

We make with renewable paperboard and food-grade coatings, and we design every line to cut waste and keep our footprint small.

ENDING PLASTIC POLLUTION

A PRACTICAL SWAP

Plastic pollution needs action, not slogans. We give tea stalls, cafés and brands a paper alternative that is hygienic, affordable and ready to print.

WORKING TOGETHER

PARTNERS, NOT ORDERS

Real change needs many hands. We work with businesses, suppliers and communities who share the goal — and we reach it faster together.

03

SUSTAINABILITY

WHY A PAPER CUP IS THE BETTER CUP

Paper cups are convenient, clean and hygienic. More important: they are made from renewable resources, and they can go back into the paper stream.

- Recyclable — paper mills re-pulp used cups.
- Wood fibre from managed forests: a renewable resource.
- Fibre breaks down — plastic does not.
- Printable surface: your brand, no extra sleeve.

SECOND LIFE OF A USED CUP

USED CUP	RE-PULPED	TISSUE	PAPERBOARD
COLLECTED	AT THE MILL	NEW PRODUCT	NEW PRODUCT

Paper mills can take used paper cups, re-pulp them and turn the fibre into tissue, recycled paperboard and other paper products.

THE EVERYDAY PROBLEM

HOT TEA. THIN PLASTIC. NOT A GOOD MIX.

Across Bangladesh, tea stalls have swapped glass for thin plastic cups. After one sip they are thrown into drains, footpaths and streets.

Health experts have raised concern that the low-grade plastic in these cups is not made for hot drinks, and that chemicals can move into the tea.

1×

USED ONCE.

One-time plastic cups, plates and glasses are used at weddings, birthdays and events — then dumped wherever they land.

FROM THE STREET

“We are using plastic even after knowing it is harmful. We throw it in streets, drains, rivers and seas without caring about pollution.”

— GIASH AHMED, MEDIA WORKER

THE HABIT

Plastic is cheap and everywhere, so it became the default — even for hot drinks.

THE COST

Blocked drains, littered streets and plastic that stays in rivers for generations.

THE SWAP

A food-grade paper cup, priced for daily use, made locally by Paperware.

THE NUMBERS BEHIND THE SWITCH

HOW MUCH PLASTIC ARE WE SAVING?

~40%

of all plastic produced is packaging — most of it used once, then thrown away.

9%

of plastic waste is recycled worldwide. 19% is burned. The rest goes to landfill or leaks into nature.

72%

of plastic packaging ends up in landfill or the open environment.

1:1

Every paper cup we make can replace one plastic cup — and it is made from a renewable, recyclable material.

The main advantage of a paper cup: it is made from fibre, not oil. Paper breaks down where plastic stays. With so many cups used every day, the switch matters at scale.

Sources: OECD, *Global Plastics Outlook* (2022) — share recycled and incinerated; UNEP and Ellen MacArthur Foundation — packaging share and end-of-life. Figures are global, rounded.

UN SUSTAINABLE DEVELOPMENT GOALS

SDG

Six of the 17 goals map directly to how we run the factory. Here is what each one means on our floor.

08
DECENT WORK & ECONOMIC GROWTH

FAIR JOBS, LOCAL GROWTH

Sustainable, inclusive growth: full and productive employment, a decent and safe work environment for our team.

09
INDUSTRY, INNOVATION & INFRASTRUCTURE

BETTER PROCESSES

Efficient resource use, cleaner production, steady technology upgrades and local manufacturing infrastructure.

12
RESPONSIBLE CONSUMPTION & PRODUCTION

LESS WASTE

Waste management, eco-friendly production, sustainable sourcing, shorter product life cycles and transparent reporting.

13
CLIMATE ACTION

LOWER CARBON

Cutting emissions, advocating for climate education and sustainable sourcing, and reducing waste at every step.

14
LIFE BELOW WATER

CLEANER RIVERS

Every plastic cup replaced is one less in a drain, river or sea. We also work to reduce our own pollution.

16
PEACE, JUSTICE & STRONG INSTITUTIONS

HONEST BUSINESS

Responsible governance, fair dealing, the rule of law and real partnerships across our supply chain.

WE LOVE WHAT WE DO

BECAUSE WE ARE PASSIONATE ABOUT IT.

Before a cup reaches your hand, it is tested in our in-house lab. Quality checks are routine here, not an extra — your peace of mind is the job.

We are more than a manufacturer; we want to be your sustainability partner. With every cup, we give you a vessel for your drink and a vessel for a better future.

Choose us, and let's build a world where loyalty to quality meets loyalty to the planet — one cup at a time.

PACK & DELIVER
Counted, sleeved, cartoned and dispatched.

09 · BEYOND THE CUP

OUR OTHER PRODUCTS

From takeaway boxes to shopping bags: food-grade, printed in-house, sized to your order. MOQ, quality control and delivery handled end to end.

BURGER & MEAL BOXES

One- and two-compartment boxes in sturdy white or soft kraft, made from food-grade paper. Hazard-free and safe for hot food.

FOOD WRAPPING & TAKEAWAY

Oil-resistant wraps and boxes that keep food fresh. Bright, sharp logo printing; hygienic from sheet to shelf.

PAPER SHOPPING BAGS

Custom-printed bags in S, M, L and XL, from premium eco-friendly paper. Low minimum order quantities.

GIFT & CONFECTIONERY BOXES

Every gift should feel special. Endless custom options in size, colour and finish — a box that is part of the gift.

09 · PRINT, LABELS & PHARMA

PRINTED WITH CARE, FINISHED IN-HOUSE

PHARMACEUTICAL BOXES

Medicine and gift boxes made to protect the integrity and safety of the products inside.

HOSPITAL STATIONERY

Prescription pads, report envelopes, patient files and X-ray envelopes.

LABEL STICKERS & HANG TAGS

Durable, weather-resistant labels and tags, custom-cut for any product.

CARTON & TISSUE BOXES

Cost-effective, biodegradable cartons. Lightweight, easy to handle and transport.

BUSINESS CARDS & BROCHURES

First impressions matter. Sharp print on paper stock that reflects your values.

NOTE PADS & CALENDARS

Desk and wall calendars, diaries and note pads — paper that gets used every day.

PRODUCT INDEX

EVERYTHING WE MAKE

RESTAURANT SUPPLIES

- Paper cups
- Sandwich box
- Pizza box
- Cake box
- Chow mein box
- Sweet box
- French fries packet
- Food parcel bag
- Food menu card
- Food menu board

10 · FIVE PROMISES

WHY SELECT US

01 **METICULOUS ATTENTION TO DETAIL**

Growth built on precision and flair. Every detail is matched to your exact needs.

02 **PUTTING CLIENTS FIRST**

We listen, we deliver personalised service, and we build long partnerships. Your satisfaction is the measure.

03 **TRANSPARENCY & INTEGRITY**

Uncompromising quality, honest timelines and open communication — the partner you can rely on.

04 **EXPERIENCE MEETS DEDICATION**

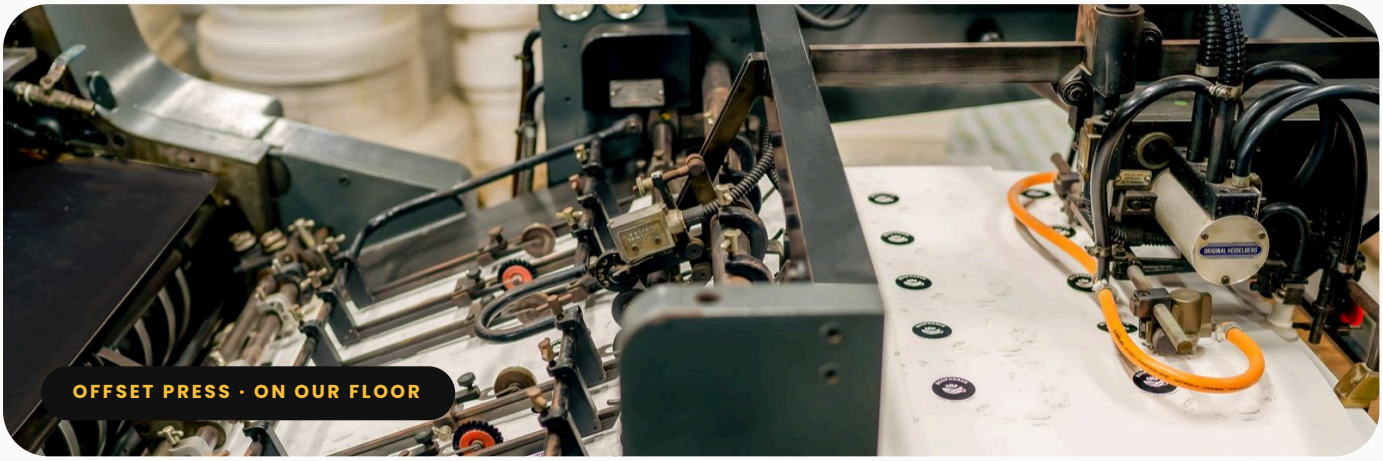

Quality and flair in balance. We adapt to a changing market and bring that experience to your brand.

05 **CHOOSING ECO-FRIENDLINESS**

We are committed to removing plastic from our surroundings and to replacing non-biodegradable products with paper.

11 · IN-HOUSE CAPABILITY

OUR PRINTING & FORMING MACHINES

OFFSET PRESS · ON OUR FLOOR

HEIDELBERG MOE

Offset printing for sharp, consistent colour.

HEIDELBERG SINGLE DEMY

Offset printing for cup sheets and packaging.

UV COATING

Protective, glossy finish against wear and tear.

HOT FOIL & EMBOSS

Foil and raised details for premium packs.

POLAR CUTTING

Precise, clean cuts on every sheet.

DIE CUTTING

Complex shapes for boxes, tags and cup fans.

PASTING

Adhesive across paper and board for boxes.

CUP FORMING

Single- and double-wall cup forming lines.

As technology moves, so do we: continuous upgrades and new software keep our print, cut and form lines precise — and every job ready for your brand.

12 · EVERY BATCH, MEASURED

CLEANLINESS & QUALITY CHECK

Hairnets, masks and gloves on the floor. Weight, leak and finish tests in the lab. A cup only leaves when it passes.

WEIGHT CHECK

LEAK TEST

VISUAL INSPECTION

CLEAN FORMING LINE

HYGIENE GEAR, ALWAYS

13 · SHEET TO SLEEVE

HOW WE MAKE PAPER CUPS

01

FOOD-GRADE PAPERBOARD

Cups start as virgin paperboard made from wood pulp, refined and pressed into sheets for strength and flexibility.

02

PRINT

Your design is offset printed on the sheet in our own pressroom.

03

PE COATING & LAMINATION

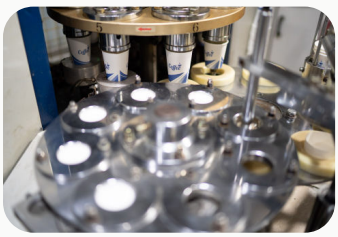

A thin food-safe PE layer makes the cup leak-proof for hot or cold drinks.

04

DIE-CUT

Sheets are cut into cup fans and bottoms with precision dies.

05

FORM

Forming machines seal the side seam, fit the bottom and curl the rim.

06

INSPECT & PACK

Cups are trimmed, checked for quality and packed — ready for your counter.

14 · TRUSTED BY

15

THE PAPER INDUSTRY

FEASIBILITY, WITH SUSTAINABILITY.

DEMAND IS MOVING TO PAPER

Bans and pressure on single-use plastic are pushing cafés, food chains and brands toward paper packaging worldwide.

LOCAL MAKES SENSE

Making cups and packaging in Bangladesh means shorter lead times, lower freight and fewer imports for local businesses.

TAKEAWAY KEEPS GROWING

More delivery, more coffee shops, more takeaway — every order needs a cup, a box or a bag.

GOOD FOR BUSINESS, GOOD FOR THE PLANET

Paper lets a brand print its story on the pack — and show customers it cares about what happens after.
